

CONSTRUCTION ROUNDTABLE OF NEW JERSEY OCTOBER 21, 2016 CRTNJ MEETING REGISTRATION

**CRTNJ Luncheon Meeting at Metuchen Golf & Country Club
244 Plainfield Road, Edison, NJ 08820**

9:00 A.M. – 10:00 A.M.: Registration, Breakfast & Networking

10:00 A.M.: Presentation

DRONES IN CONSTRUCTION

Drones are extremely versatile. They can fly from a few inches from the ground up to 400 feet panning or framing a chosen subject, move left, right, up or down or rotate on the same spot because the pilot has a real time visual of the object under surveillance. The quality of the pictures is outstanding as they shoot in full HD.

An aerial view of property allows for a unique perspective of a site's overall condition, surrounding properties, water features, roadways and other elements critical in decision making for acquisition and development. Due to their size drones are able to fly into areas that may be inaccessible or hazardous to assess structure and land conditions.

SPEAKER:

Donald W. Richardson, CPG, President, EWMA

Donald Richardson is an expert in environmental risk management, investigation, remediation (vapor, soil, ecological and groundwater media), post remediation care and Brownfields redevelopment. With over 25 years of

environmental consulting and contracting experience, He has a broad range of project experience from preliminary site evaluations and underground storage tank closures to comprehensive subsurface investigation and remediation services under federal and state environmental regulatory programs. He has provided expert claim support services and testimony regarding the following areas: chemical time of release and occurrence; remediation performance and effectiveness; underground storage tank closure (both contractor and design professional claims); cost allocation and recovery and construction dewatering.

Don received his Bachelor of Science degree from Washington and Lee University in Geology and his Master's Degree in Hydrology (special emphasis in Engineering and Hydrogeology) from the University of New Hampshire. He is a frequent speaker on the integration of innovative cleanup strategies to meet both regulatory closure and project business objectives. He has led the use of Guaranteed Fixed-Price Remediation on projects ranging from \$300 thousand to \$10 million in both government and private sectors.
